

Human Development Report 2019

Beyond income, beyond averages, beyond today:
Inequalities in human development in the 21st century

Friday, 13 December 2019
10.00-11.30 am

Tiedekulma / Think Corner
Yliopistonkatu 4, Helsinki

ABOUT THE REPORT

Almost 30 years since its inception, the Human Development Report remains a powerful voice. This year's report deals with inequalities in the 21st Century and how they weaken social cohesion and economic growth, and damage people's trust in government, institutions and in each other.

By looking beyond income, beyond averages, and beyond today, the report presents analysis, ideas and policy options to tackle inequality's drivers, recognizing that many inequalities are the symptom of an unfair system rather than the cause.

Come and find out more – including how Finland ranks on the Human Development Index this year – as UNDP invites you to the Finnish launch of the 2019 UNDP Human Development Report on the 13th of December at 10.00 am at Think Corner.

with
