Forced Displacement is a Global Challenge

● 21.3m refugees worldwide by 2021, +7.4m from Ukraine by June 2022

● This population has more than doubled in the last decade

How to effectively support refugees?

- Most work focused on impacts of forced displacement in host communities ([Becker and Ferrara, 2019](#); [Schuettler and Verme, 2021](#))
- Emerging evidence on how to effectively support refugees
 - ① Cash transfers ([Altındag, and O'Connell, 2021](#); [Özler et al., 2020](#); [Moussa et al., 2022](#); [Hızıroğlu et al., 2022](#))
 - ② Shelter programs ([Miguel et al., 2022](#))
 - ③ Mental health value of work ([Hussam et al., 2022](#))
- **This paper:** How to promote economic **self-reliance** for refugees through economic regularization?

What are the impacts of migratory amnesties/regularization on refugee's lives?

- **Migratory amnesties:** give undocumented migrants working rights, legal free mobility, and access to safety nets in hosting countries.
- Identify the impact of a generous amnesty for undocumented Venezuelan refugees:
 - ① Well-being: consumption, labor income, employment
 - ② Health (physical and mental)
 - ③ Access to state services
 - ④ Other labor market outcomes

Most Related Literature

● Existing evidence

- Native workers ([Fallah et al. 2018](#); [Bahar et al., 2021](#))
- Local crime rates ([Baker 2015](#); [Pinotti 2017](#))
- Developed countries and labor markets ([Amuedo-Dorantes et al., 2007](#); [Amuedo-Dorantes and Antman, 2016, 2017](#); [Monras et al., 2018](#))

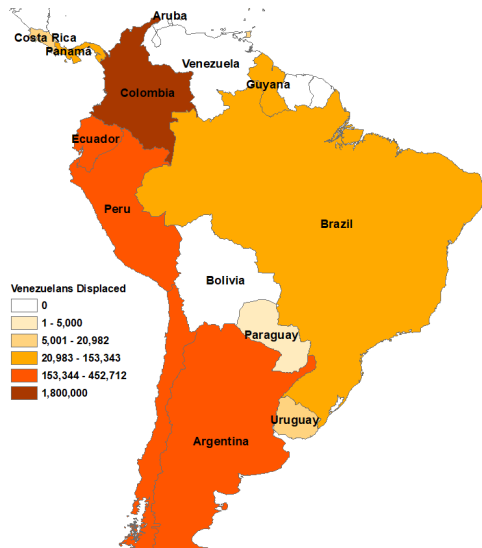

● Contribution

- Developing country: ↑ informality
- Comprehensive life outcomes
- Large scale sudden regularization
- No eligibility criteria

Context: The Amnesty Program Permiso Especial de Permanencia (PEP)

PEP was a Generous Amnesty

Study Design

The Venezuelan Refugee Panel Survey (VenRePS)

Control: irregular migrants

Treatment: PEP-RAMV

- **Eligible migrants:** RAMV-Census
- **Ineligible migrants:** Referrals from RAMV refugees and databases from refugee organizations
- **Sample:** Ven. migrants, 18+, arriving between Jan 2017-Dec 2018.

The Survey Collection

Cities:

- **Big cities:** Bogotá, Barranquilla, Medellín
- **Small cities:** Cúcuta, Villa del Rosario, Cali, Cartagena, Riohacha, Maicao, Uribia, Valledupar, Santa Marta and Arauca

Size: 2,232 refugee families

- Eligible (RAMV): 1,110
- Ineligible (Non-RAMV): 1,122

Phone surveys by Venezuelan enumerators

Empirical Strategy

Timeline

The Empirical Design: Fuzzy RDD

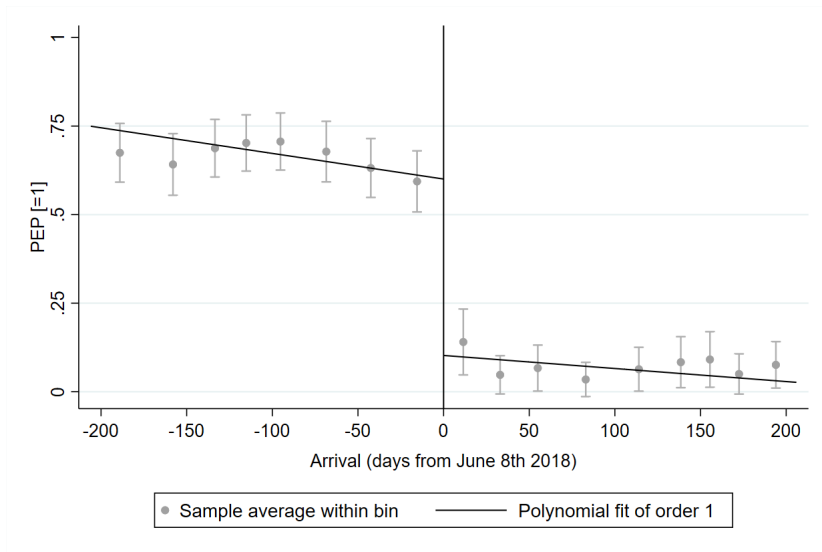

— Probability of treatment (left)

█ Families by week of arrival
[McCrory test p-value: 0.969]

* Observations grouped by week of arrival

The Empirical Design (cont'd): Fuzzy RDD

Validity of the local continuity assumption

Notes: This table tests the validity of the local continuity assumption in all the baseline covariates used as controls in all the specifications. The controls are defined as dependant variables in a sharp RD estimation. The estimation uses a triangular kernel and a common MSERD optimal bandwidth.

Results

Summary of Results

PEP improves migrants well-being and access to state services

- ① **Well-being:** Higher overall well-being ($\uparrow 1.08$ STD):
More labor income ($\uparrow 22\%$), consumption ($\uparrow 48\%$), and employment ($\uparrow 0.26$ pp)
- ② **Access to state services:** Higher overall access to state services ($\uparrow 1.66$ STD):
SISBEN Access ($\uparrow 56$ pp)
Subsidized Healthcare ($\uparrow 26$ pp)
Financial products ($\uparrow 44$ pp)
Transfers from government ($\uparrow 22$ pp)
- ③ **Health outcomes:**
Higher overall physical health ($\uparrow 1.30$ STD):
Better physical mobility ($\uparrow 1.03$ STD)
Self-sufficiency for personal care ($\uparrow 0.86$ STD)
Self-sufficiency for daily routine ($\uparrow 1.51$ STD)
No changes in mental health
- ④ **Other labor outcomes:** No changes in labor formalization or hours worked

Impacts of PEP on Well-being

| | Well-being (Index) | Consumption per Capita (log) | Labor Income (log) | Employed |
|----------------------------|-----------------------|------------------------------------|-----------------------|------------|
| | (1) | (2) | (3) | (4) |
| 1[PEP _i = 1] | 1.028* | 0.481** | 0.221* | 0.261* |

Robustness Test

- ① Multiple Hypothesis testing
- ② Different bandwidths
- ③ Different polynomial order
- ④ Different kernel specification
- ⑤ Show migrants contacted through organizations and migrants are comparable

PEP partially helps workers to enter formal labour markets and improves their work conditions.

“

"We would wake up at 5 am and at 5:30 am we were in the mountains. At 7 pm, when it was already dark, we were just finishing, covered in mud, wet because even if it rained we did not stop [...] that was the hardest part of this story. Being without a document is very hard. You always lose"

Irregular man in Medellín
(about his experience as a rural wage worker)

“

"We have tried to get the language academy started but many doors have closed to us because we are Venezuelan. Many people have told us they are not willing to hire Venezuelans"

(Man with PEP in Bogotá)

LIFE OUT OF

SHADOWS

Migrants with PEP feel more integrated to society

“

“There is a change because when the police stops me and they ask me: “you are Venezuelan, do you have a PEP?” When I show them my PEP their attitude changes, I mean their face changes, in the sense that they say “ah, you are legal, you can go.”

(Woman with PEP in Barranquilla)

Conclusions

- ① PEP improves well-being
 - Better consumption, income, and employment and effects are large. The increment in consumption from CCTS in Colombia, Mexico and Indonesia range from 0-15% ([Attanasio and Mesnard, 2006](#); [Angelucci and Attanasio, 2009](#); [Cahyadi et al., 2020](#))
- ② PEP improved health status (specially physical self-reported)
- ③ PEP improved state service access
- ④ Coupled with low impacts on host labor markets ([Bahar et al., 2021](#))
make **strong case of virtues of formalization**

Thank you!
