# ROADMAP FOR **THIS SESSION**

## 1. Background and Motivation

## 2. The MPI Methodology

## 3. Data and MPI Structure

## 4. Results

- Household
- Individual
- Intrahousehold

# BACKGROUND AND MOTIVATION

**GENDER DIMENSIONS OF  
FORCED DISPLACEMENT**

---

Understanding Inequality Through Data & Analysis

# THE STATE OF PLAY FOR DISPLACEMENT WORLDWIDE

---

In 2020, **30.7 million people** across the world were newly displaced due to natural disasters, with **another 9.8 million people** forcibly displaced due to conflict and violence (IDMC 2021).

While the displaced population only amounts for 1% of the global population, they are disproportionately affected by deprivation, often chronic.

For instance, many displaced people reside in countries and areas affected by **acute food security and malnutrition** (UNHCR 2020), and many of the internally displaced and refugee families live in **temporary housing or camps with basic living conditions** and have **limited access to services and employment**.

# BY THE END OF 2020...

---

**ETHIOPIA** had around 2.7 million IDPs (about 75% due to conflict and violence).

**NIGERIA** had around 2.9 million displaced people.

**SOMALIA** had just under 3 million IDPs (the majority due to natural disasters).

**SOUTH SUDAN** had about 1.5 million displaced people.

**SUDAN** had around 2.7 million IDPs (over 80% due to conflict and violence).

# WHAT DOES THIS ANALYSIS BRING?

- A **multi-country descriptive analysis** of forced displacement and multidimensional poverty
- Analyze **differences in levels and composition** based on displacement status and gender of the household head
- Compare **MPI and income poverty** in these contexts
- Implications for **policy and institutional setting**

# THE MPI METHODOLOGY

**GENDER DIMENSIONS OF  
FORCED DISPLACEMENT**

---

Understanding Inequality Through Data & Analysis

## FIRST, WHAT IS MULTIDIMENSIONAL POVERTY?

Increasing recognition that poverty consists of more than simply lack of income – it can also be defined as the situation of suffering from **multiple overlapping deprivations**, such as lack of education, inadequate housing, poor health, no access to clean water, etc.

The SDGs call for “**eradicating poverty in all its forms and dimensions**” .

Multidimensional poverty is **a complement to (not replacement of) monetary poverty**. Studies consistently find differences in both the populations identified and the patterns of poverty reduction for the two measures.

# OKAY, SO WHAT IS AN MPI?

## 1. Counting-based multidimensional poverty measure

## 2. Adaptable to various contexts and priorities

## 3. Based on Alkire-Foster (2011) method

- Selection of dimensions, indicators, cut offs and weights
- Individual deprivation profiles
- Dual cutoff identification
- Headline measure:  $MPI = \text{Incidence (H)} \times \text{Intensity (A)}$

## 4. Policy relevant

- Subgroup disaggregation
- Composition by indicator
- Shows overlapping deprivations

$$MPI = H \times A$$

# DATA AND MPI STRUCTURE

**GENDER DIMENSIONS OF  
FORCED DISPLACEMENT**

Understanding Inequality Through Data & Analysis

# DATA

COUNTRY	SURVEY	GEOGRAPHICAL COVERAGE	POPULATION COVERAGE	RETAINED SAMPLE
<b>Ethiopia</b>	Skills Profile Survey (2017)	Refugee camps and proximity in Tigray Afar, Gambella, Benishangul Gumuz, and Somali regions	Refugees of four main nationalities (Eritrean, South Sudanese, Sudanese, and Somali) and hosts	26,517 (96.5%)
<b>Nigeria</b>	IDP Survey (2018)	Six Northeastern states (Adamawa, Bauchi, Borno, Gombe, Taraba, and Yobe)	IDPs and host communities	17,543 (97.7%)
<b>Somalia</b>	High Frequency Survey (2017)	Somalia (within secure areas)	IDPs and host communities	27,287 (82.3%)
<b>Sudan</b>	IDP Profiling Survey (2018)	Abu Shouk and El Salam camps, and neighboring and non-neighboring Al-Fashir	IDPs and host communities	17,645 (95.2%)
<b>South Sudan</b>	High Frequency Survey Wave 4 (2017)	Urban areas of seven of the ten pre-war states (Western Equatoria, Central Equatoria, Eastern Equatoria, Northern Bahr-El-Ghazl, Western Bahr-El-Ghazal, Warrap, and Lakes state)	IDPs and host communities	4,554 (92.8%)

DIMENSION	INDICATOR	CUT-OFF (DEPRIVED IF...)	WEIGHT
Education	School attendance	Any child in primary age is not attending school up to class 8	1/8
	Years of schooling	Any household member 12+ has not completed 6 years of school	1/8
Health	Physical safety	Member reports feeling unsafe walking alone	1/16
	Pregnancy care	Woman did not visit clinic while pregnant or have trained assistant during delivery	1/16
	Food security	Household did not have enough food or money for food in past 7 days	1/16
	Early marriage	Any member was married before age 19	1/16
Living Standards	Garbage disposal	Main method of disposal is dumping, burying in own land, burning, or other	1/24
	Drinking water	Main source of drinking water is unclean or more than 20 minutes away (roundtrip)	1/24
	Sanitation	Main toilet facility is inadequate (incl. sharing)	1/24
	Electricity	Household does not have electricity	1/24
	Cooking fuel	Main energy source for cooking is solid fuel	1/24
	Housing	House type is tent, squatting, or other inadequate type	1/24
Financial Security	Unemployment	Any member aged 15 or over is not working and looking for work	1/12
	Legal identification	No member in the household has legal ID	1/12
	Bank account	Does not have bank or mobile money account	1/12

# RESULTS: HOUSEHOLD LEVEL

**GENDER DIMENSIONS OF  
FORCED DISPLACEMENT**

---

Understanding Inequality Through Data & Analysis

# RESULTS

Note: These results are statistically significant for all countries except Nigeria. This holds even though the displaced populations vary tremendously in the different country contexts, from internally displaced people in Sudan or Somalia to refugees living in camps in Ethiopia.

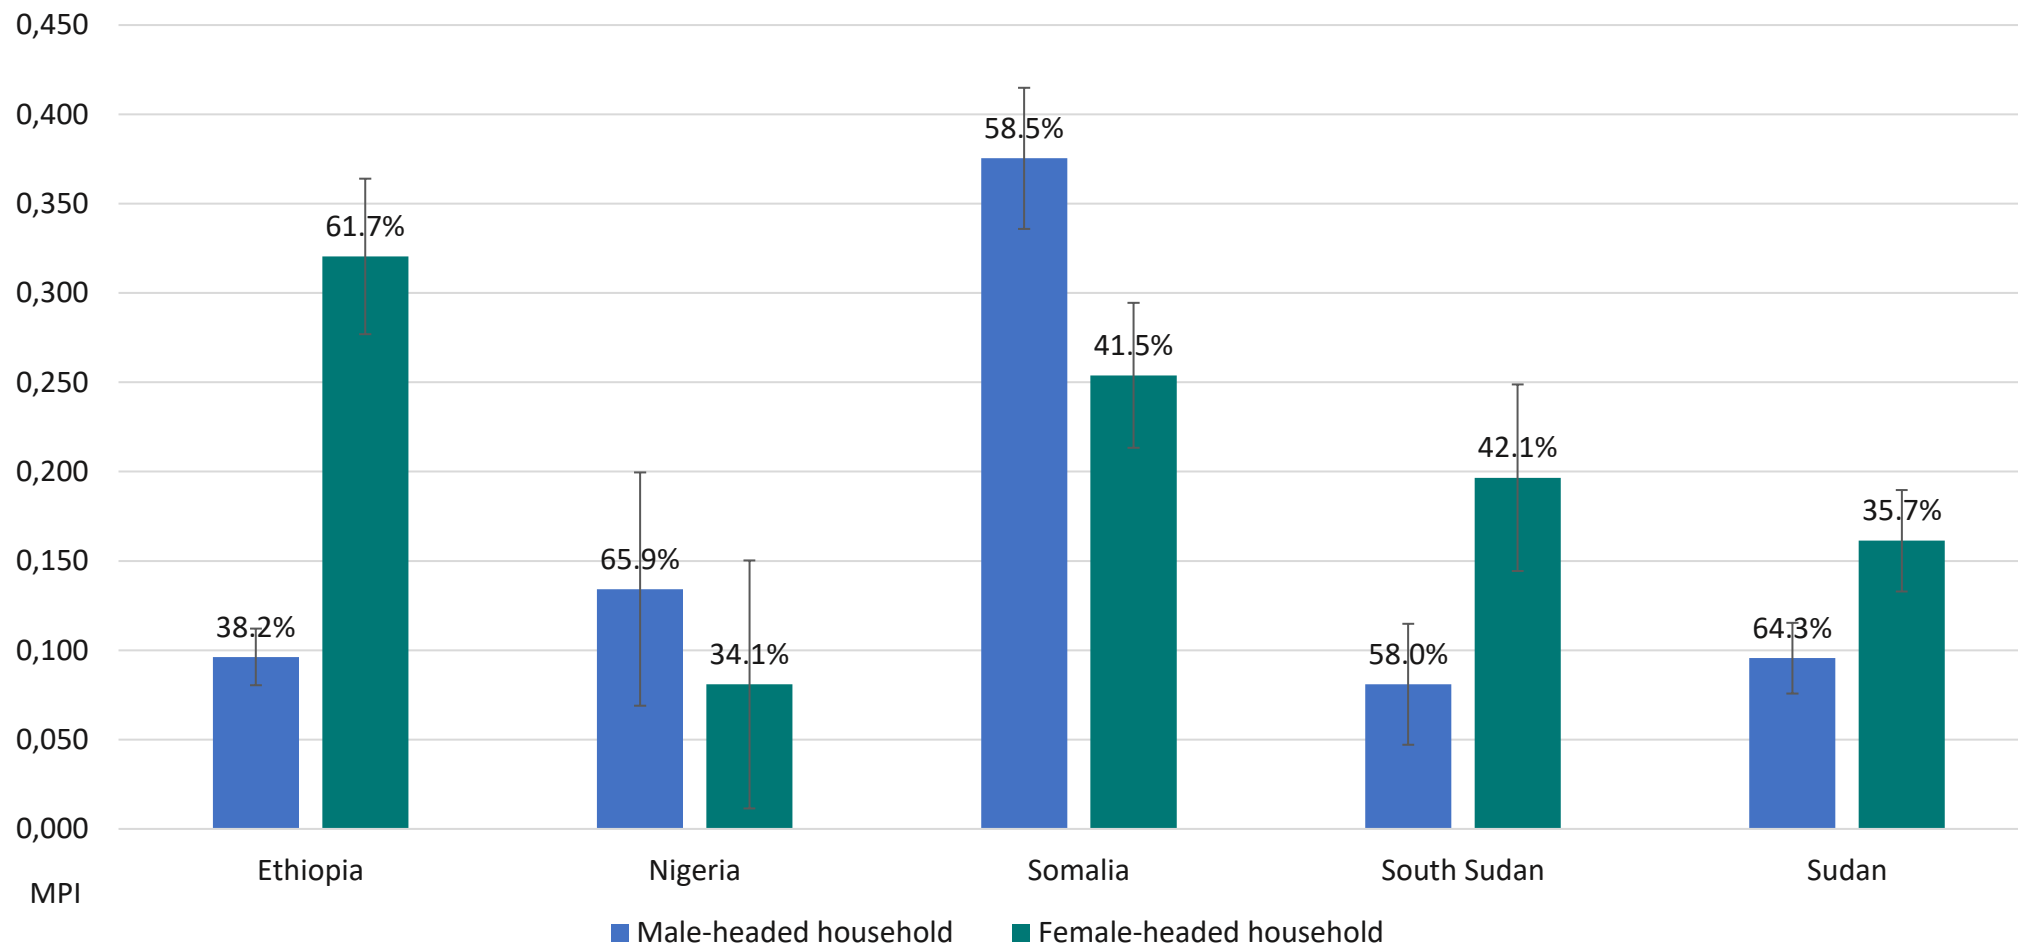

COUNTRY	DISPLACEMENT STATUS	MPI	INCIDENCE (H)	INTENSITY (A)	POPULATION SHARE
Ethiopia	Host Community	0.073	12.8%	57.3%	12.0%
	Refugee	0.270	45.5%	59.4%	88.0%
Nigeria	Host Community	0.107	17.0%	62.7%	71.5%
	IDP	0.139	23.3%	59.8%	28.5%
Somalia	Host Community	0.286	44.8%	63.8%	64.3%
	IDP	0.396	63.3%	62.5%	35.7%
South Sudan	Host Community	0.119	19.5%	60.9%	86.7%
	IDP	0.203	34.1%	59.5%	13.3%
Sudan	Host Community	0.054	9.4%	57.0%	67.5%
	IDP	0.255	43.6%	58.5%	32.5%

# INTENSITY OF DEPRIVATION AMONG THE POOR

Note: These results show the distribution of the average share of weighted deprivations (intensity) among the multidimensionally poor population.

INTENSITY	ETHIOPIA		NIGERIA		SOMALIA		SOUTH SUDAN		SUDAN	
	Host	Refugee	Non-IDP	IDP	Non-IDP	IDP	Non-IDP	IDP	Non-IDP	IDP
50-59%	65.5	57.3	59.2	49.1	45.8	34.0	54.8	57.0	71.6	61.8
60-69%	31.0	34.2	35.0	35.7	33.6	42.4	21.4	36.7	21.6	29.7
70-79%	3.0	7.4	5.9	13.6	17.1	17.6	21.3	6.3	6.8	7.8
80-89%	0.5	1.1		1.7	3.1	5.6	2.6			0.8
90-100%					0.3	0.4				

## MPI FOR MALE- AND FEMALE-HEADED HOUSEHOLDS BY COUNTRY

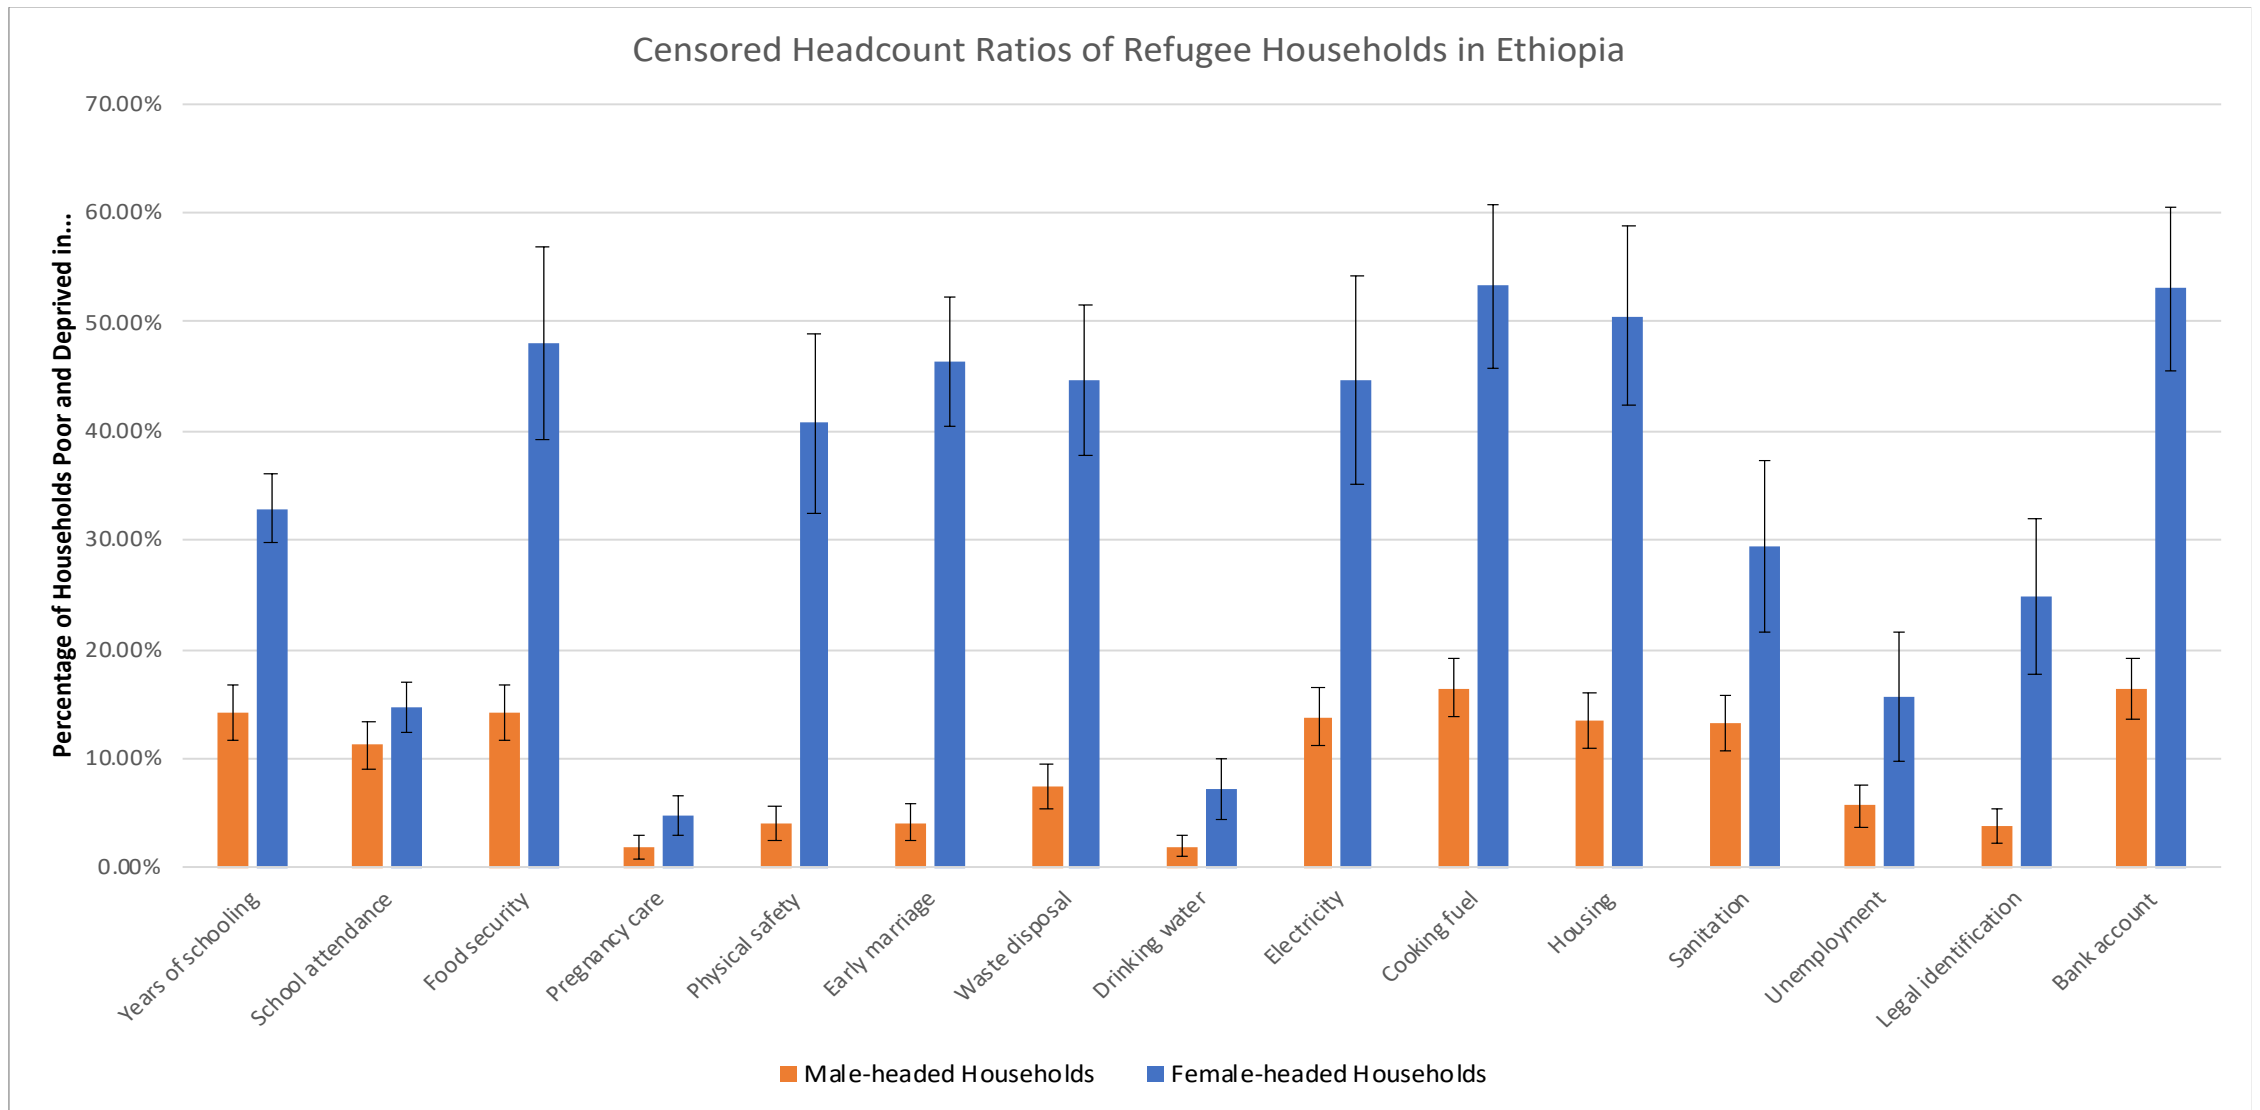

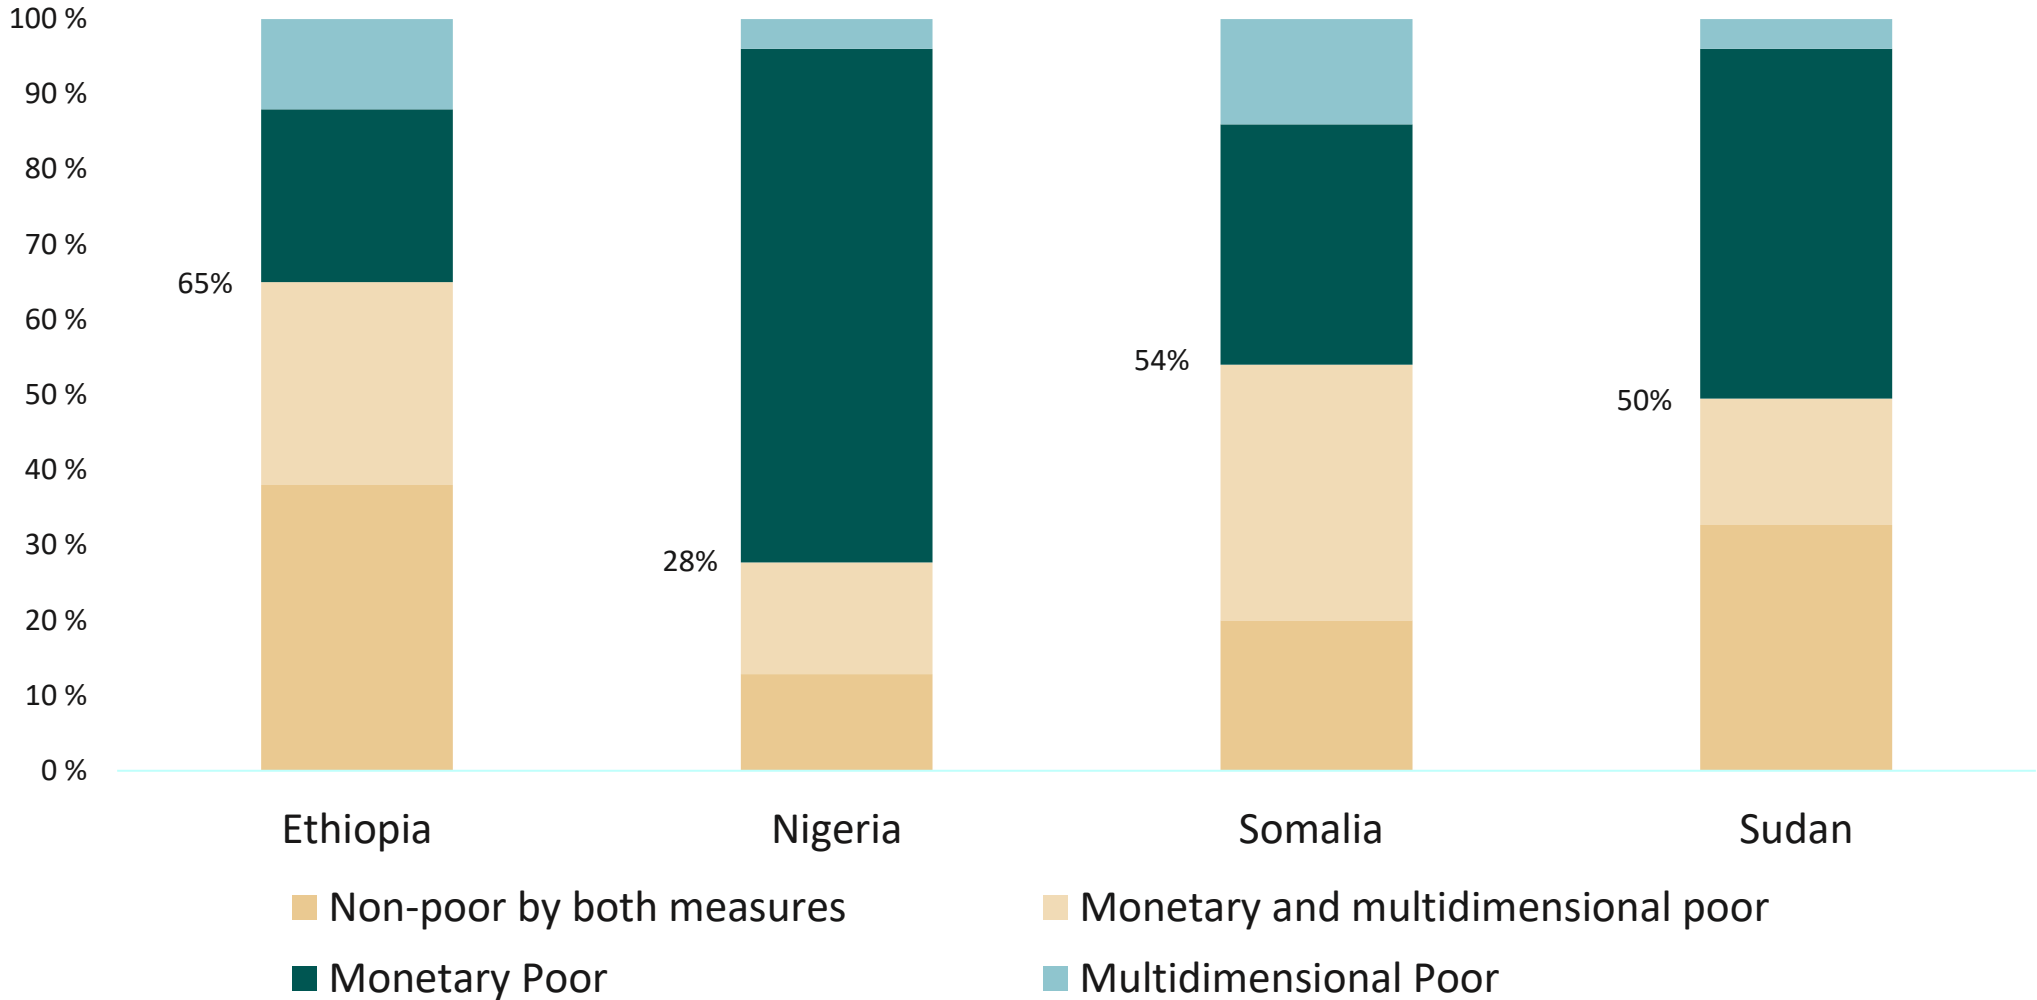

## DIFFERENCES BY DISPLACEMENT STATUS

## DIFFERENCES BY GENDER OF THE HOUSEHOLD HEAD (REFUGEES)

# POVERTY MEASURES IDENTIFY DIFFERENT POPULATIONS

**NOTE:** We use the international poverty line of \$1.90 PPP (2011) per day to compute poverty rates. Notice that the levels of monetary and multidimensional poverty are not directly comparable – so, we make comparable categories **within** each measure.

# RESULTS: INDIVIDUAL LEVEL

**GENDER DIMENSIONS OF  
FORCED DISPLACEMENT**

---

Understanding Inequality Through Data & Analysis

# WHAT DOES THIS ANALYSIS BRING?

**As the MPI is a household-level measure of multidimensional poverty, strictly reporting the MPI headline results obscures the **divergent experience of individuals** within the household.**

# Percentage of the Population who are Multidimensionally Poor, by Gender and Displacement Status

# Percentage of the Under-18 Population who are Multidimensionally Poor, by Gender and Displacement Status

# INDIVIDUAL-LEVEL DEPRIVATIONS

---

**We now turn to compare gendered differences in deprivations, as well as multidimensional poverty, by displacement status, to assess gender gaps.**

**These indicators span three of the four dimensions: education, health, and financial security.**

# KEY TAKEAWAYS

- **High levels of variation among deprivation levels, gender gaps, and countries in the five indicators**
- **Even still, gender gaps in early marriage are significant in all countries, across displacement status and poverty status, with women more deprived than men**

# RESULTS: INTRAHOUSEHOLD

**GENDER DIMENSIONS OF  
FORCED DISPLACEMENT**

---

Understanding Inequality Through Data & Analysis

# INTRAHOUSEHOLD INEQUALITIES

---

Displaced people experience multidimensional deprivations that result both from their **current circumstances** and the disadvantages they may have **accumulated** in their home country.

For example, refugees fleeing long-term conflicts may not have completed primary education due to chronic disruptions, reducing years of schooling. Meanwhile, deprivations in the current school attendance indicator reflect the individual's present circumstances.

Both **accumulated** and **contemporaneous** disadvantages shape the lived realities of forcibly displaced populations

# INTRAHOUSEHOLD INEQUALITY IN EDUCATION

Country	Population Share of School-age Children (n)				School-age children who reside in an MPI poor household where they attend school, and another does not (%)				Chi-squared test for gender	Chi-squared test for IDP status
	IDP		Non-IDP		IDP		Non-IDP

SUD	2,911	2,832	5,916	5,986	32.75	33.52	17.02	16.71		

Note: Significance at 1% \*\*\*, 5% \*\*, and 10% \* levels. The [] brackets indicate a sample size that inhibits rigorous statistical testing.

# KEY TAKEAWAYS

- Our comparisons of the household and individual-level deprivations and intrahousehold analyses suggest **displacement status most affects household status**, whereas **gender drives differences within households**.
- The individual deprivations reflect aspects of both displacement and gender.
- More broadly, the analysis underlines the importance of **going beyond household-level outcomes**, especially in education.

# FUTURE RESEARCH?

---

**Future research and measurement tools should usefully prioritize intrahousehold breakdowns if they are to serve the most vulnerable.**

**Further analysis of each MPI by country – their geographic regions, rural/urban divides, and administrative divisions, as the samples allow – would inform policymakers where to deploy those programs.**

**Further research on the intra-country level would also be valuable.**
