About the Conference

Following the successes of the 2016, 2018, 2019, 2020 and 2021 Jobs and Development Conferences, the World Bank, IZA (Institute of Labor Economics), the Network on Jobs and Development*, and UNU-WIDER are organizing a follow up conference focused on [“The challenge of creating better jobs in developing countries”](#).

The conference will take place on December 14-15, 2022, in Cape Town, South Africa. The two-day format will feature keynote speeches, a policy panel, special sessions and about 50 paper presentations in parallel sessions. The event will focus on policy-relevant research, applicable to identifying solutions to jobs challenges in low- and middle-income countries**.

To expand the frontiers of global knowledge around jobs and advance the discussion on the most effective policies, we are interested in policy-relevant papers on all topics in labor and development economics, but especially in papers that focus on:

- New platform economy jobs
- Labour market programmes and regulation
- Gender and labour markets
- COVID-19 pandemic, jobs and development
- Immigration, migration and skills
- Structural change
- Climate change, energy and jobs

We are particularly interested in these themes, but don't discourage any relevant topic on jobs and development policy and issues.
